

ADVENT WREATH

A great 14th of December to all of you!
Today I have an idea for you how you can make your own very unique Advent wreath.

First, you will make two amigurumi-flowers named *Eonemone* using Ito Kouki in Parchment for the petals and Moonrock for the stem and leaves, as well as Kin Gin Silver Gold for the ovary. Any other leftovers that look good to you will do, of course.

Now you buy a rattan wreath, decorate it first with a ribbon, then with the two *Eonemones* ...and that's it! The wreath is finished.

Btw, the flower pattern will be available for a discounted price today only. So be quick if you plan on making this.

Enjoy your special wreath, a symbol of your passion for all things yarn and knitting!
